Solaris

990 Bruma

Ref. 21439

Fabric innovation designed to optimize ambient light and thermal control. Solaris is an elegant, textured fabric, which reflects sun light, improving thermal comfort in a room. It also prevents sun glare on computer and TV screens and provides privacy and heat protection. The inner side of the fabric has a natural, appealing texture. The outer side (the once closest to the window) is made from a special yarn that helps reflect heat and light away. Solaris, by EQUIPO DRT, is the choice functional and decorative fabric for enhanced light and thermal management, creating a perfect balance inside and outside.
