Nemus

000 Natur

Ref. 22163

Nemus is a textile evocation of nature, an ethereal grove designed by Vicent Martínez and Ana Hernández applied to a Equipo DRT fabric. Inspired by the essence of forests – groves and copses – this curtain fabric transforms the space with a play of light and shadow. The design, worked with the devoré technique, creates transparencies that filter the light in a subtle way, drawing silhouettes of branches and leaves in an enveloping composition. Like a moving landscape, Nemus projects the sensation of being immersed in a serene forest, where nature and architecture merge in an atmosphere of calm and harmony.

Composition

66% Visc. 18% Lin. 16% Pol.

Width
