335 Azul

Ref. 22320

The true magic of the Denia pouf lies in its ability to combine straight lines and curves in a harmonious synthesis with the fabrics that envelop it. This dialectic between straight and curved, the base and the envelope, reflects a deep understanding of how opposites can complement each other to create something truly exceptional. In the Denia pouf, designed by Vicent Martínez, the straight lines enhance a firm structural base, while the curves seduce with softness and comfort, highlighting the proposed fabrics and colours. The intersection of these elements not only improves the functionality of the seat, but also gives it a unique aesthetic. Straight lines and curves balance each other, creating a piece that is both an object of daily use and a work of art. A solid multipurpose seat that combines curves and straight lines revealing a search for the perfect balance between functionality and aesthetics. Straight lines provide stability and clarity, while curves introduce fluidity and comfort.

Valid for

Remarks

MEASURES: 47x45x40 cm

OUTSIDE: Outdoor fabric made of solution dyed outdoor acrylic fiber. Water-repellent, resistant to colour loss in the sun

INTERIOR: Hard foam Cal 30 Dax non-deformable. Wooden interior structure
